

Model No.:GD3024JMH/GD3024JMHB

|   |   |   |
|---|---|---|
| Input   | input source  | L+N+PE  |
|   | rate input voltage                                    | 220/230/240V ac   |
|   | voltage range   | 90~280V ac(normal mode)<br>170~280V ac (UPS to UPS mode)                            |
|   | frequency   | auto adaptive   |
| Output  | output voltage  | 220/230/240V ac ±5%   |
|   | output frequency                                      | 50/60Hz ±0.1%   |
|   | output wave form                                      | pure sine wave  |
|   | rate capacity   | 3000W   |
|   | peak power  | 6000VA  |
|   | over load ability                                     | battery mode:21S @105~150%<br>load/ 1s @150~200% load<br>/400ms@>200% load          |
|   | transfer time(adjustable)                             | computers 10ms appliance 20ms   |
| Grid connected operation(only for GD3024JMHB) | output voltage  | 220/230/240V ac   |
|   | grid voltage range                                    | 195~253V ac   |
|   | grid frequency range                                  | 50±1 Hz/60±1 Hz   |
|   | rated output current                                  | 23.9A   |
|   | power factor range                                    | >0.99   |
|   | conversion efficiency                                 | 98%   |
| Battery                                       | Max Parallel units                                    | 9   |
|   | range voltage   | 24 V dc   |
|   | constant charge voltage(adjustable)                   | 28.2V dc  |
| Interface                                     | float charge voltage(adjustable)                      | 27 V dc   |
|   | RS232   | Baud rate 2400  |
|   | communication interface                               | Lithium Battery BMS<br>Communication Card,WIFI Card,Dry contact                     |
| Charger                                       | parallel card(optional)                               | support parallel(Max 9pcs)  |
|   | PV charge mode  | MPPT  |
|   | MAX PV input power                                    | 4200W   |
|   | MAX PV input voltage                                  | 500V dc   |
|   | MPPT Tracking range                                   | 120~500 V dc  |
|   | best PV voltage                                       | 300~400V dc   |
|   | MAX PV input current                                  | 18A   |
|   | MAX PV charge current                                 | 100A  |
| Display                                       | MAX ac charge current                                 | 60A   |
|   | MAX charge current                                    | 100A  |
| Environments                                  | LCD display   | Display Running Mode/Loads/Input Output etc   |
| Environments                                  | oprate temperature                                    | (-10~+50) °C  |
|   | humidity  | 20%~95%(Non-condensing)   |
|   | storage temperature                                   | (-15~+60) °C  |
|   | Ork altitude  | No more than 1000m,if >1000m the power rate will lower, Max 4000m,refer to IEC62040 |
|   | noise   | <50db   |
| Dimension                                     | L*W*H(mm)   | 495*312*146   |
| Standars & certifications                     | EN-IEC60335-1,EN-IEC 60335-2-29,IEC 62309-1,IEC 62040 |   |

\*The suffix of the model name contains the letter "B", which is the on grid model of the power model
